

Guide for the use of IDEs CGRA

Google Chrome -

1 Open site in Google Chrome

2 Open Developer Tools. (Win: Icon Preferences> More Tools> Developer Tools, Mac: View> Developer> Developer Tools) Quick access tip: CtrlShiftI or right and make Inspect.

3 Press the tab "Sources"

4 In the root of the tree, right-click and "Add Folder to Workspace" and choose the corresponding directory on disk.

5 You will see a new local file tree. Search for files to edit this tree.

6 Select with the right of the files in the local file tree and select the "Map to Network Resource" and choose the corresponding file from another tree. Chrome will make the combination of all matching files.

7 Save with Ctrl+S (WSSD)

Eclipse -

<https://eclipse.org/downloads/packages/eclipse-ide-javascript-web-developers/indigosr2>

1 File> New> Project Javascript

2 Name the project (eg, CGRA).

3 Create project from existing source, choose directory.
